THE HEADQUARTERS AGREEMENT SIGNED BETWEEN
THE GOVERNMENT OF GHANA (GOG) AND THE FORUM
FOR AGRICULTURAL RESEARCH IN AFRICA (FARA)

25TH APRIL, 2019
CABINET MEMORANDUM

EXECUTIVE SUMMARY

1. Cabinet Decision Requested

Cabinet is respectfully requested to approve for ratification, the Headquarters Agreement signed between the Government of Ghana (GoG) and the Forum for Agricultural Research in Africa (FARA) as part of Ghana’s commitment to host FARA’s Headquarters in Ghana.

2. Background Information

The Forum for Agricultural Research in Africa (FARA) was established in 2001 by the Sub-regional agricultural Research Organizations (SROs) on behalf of their respective Member States. FARA serves as the apex continental organization responsible for advancing food and agricultural research. It is also the technical arm of the African Union Commission (AUC) on matters concerning agriculture science, technology and innovation (STI).

In performing its mandate, FARA works in conjunction with the SROs to support countries to plan and coordinate the implementation of the research and innovation necessary to achieve targets of continental agricultural development and food security policies. In this regard, FARA served as the lead institution for the AU’s Comprehensive Africa Agriculture Development Programme (CAADP)’s pillar responsible for research and extension. Currently, FARA is spearheading the implementation of the Science Agenda for Agriculture in Africa, a framework endorsed by the AU to deploy STI towards achievement of several CAADP targets for 2025, notably: doubling agricultural productivity sustainably, halving post-harvest losses and ensuring that 30% of farms are resilient to climate risks, using 2014 as the baseline. Ghana is among the first set of countries that have signed a commitment to implement the Science Agenda.

At its inception in 2001, FARA was hosted by the United Nations Food and Agriculture Organization (FAO)’s sub-regional office for Africa based in Accra, Ghana. FARA then negotiated a Headquarters Agreement with the Government of Ghana (GoG), which was signed on 14th October, 2003. The then Minister for Foreign Affairs and Regional Integration, Nana Addo Dankwa Akufo Addo signed this Agreement on behalf of the GOG.

2
Over the years, the Ministry in charge of Science and Technology has been the Government Institution that oversees the activities of the Forum for Agricultural Research in Africa.

2.1 Key provisions of the Headquarters Agreement
The Headquarters Agreement includes the following provisions;

a) Government shall provide suitable office accommodation in Accra as the Headquarters of FARA;
b) Government shall provide suitable residential accommodation for the Executive Secretary; the cost of the accommodation shall be borne by FARA;
c) The extension of tax exemptions, immunities and privileges on FARA’s assets, communication, transport and their officials;
d) Provisions on the applications of the laws of Ghana to the activities of FARA and
e) Waiver of immunities.

2.2 FARA’s Accommodation Arrangements since Its Establishment

At its inception in 2002, FARA was hosted by the FAO’s Regional Office for Africa in Accra. In August 2003, FARA moved into a rented premises at 2 Gowa Close in Roman Ridge, Accra. At this location FARA converted a residential house into an office, in 2004. As FARA expanded, the landlord of 2 Gowa Close provided more space by constructing a two storey block on the same plot which comprised a conference room and eight offices. FARA continued to expand thereby requiring extra office space. Consequently, in 2008 FARA rented additional space on Ridge road, about 50 meters from the main office, to consolidate all staff in the same premises and to provide for the envisaged further expansion. FARA in 2009 moved to its current premises on 12 Anmeda Street in Roman Ridge.

For over a decade since FARA rented its premises, it has continued to make rent payment on its own except for a brief period in 2016 when the government made a deposit of seventy five thousand dollars (US$75,000) towards the payment of half of FARA’s rent for that year.

FARA’s total expenditure on office rent has amounted to nearly USD1.6 million, of which USD75,000 was paid by the Government of Ghana. The rent charged per year started from USD33,000 in 2003 to USD150,000 per year presently. The rent paid over the period is illustrated in Figure 1 below.
FARA would have preferred to direct most of the funds it has spent on renting office accommodation towards construction of its premises on the land provided by the Government of Ghana. However, the conditions attached to FARA’s funding do not allow for investing in capital works such as construction of a building.

3. Justification for Government Action

Pursuant to Article 75 of the 1992 Constitution of the Republic of Ghana, the Headquarters Agreement should be ratified by the Parliament of Ghana following its execution between the government of Ghana and FARA.

Furthermore, since its establishment in Ghana, FARA has successfully made valuable contributions in Ghana and the continent as a whole. Table 2 below outlines the contributions and achievements of FARA in Ghana.

4. **Options and Impacts Considered**

   a. The Government of Ghana may ratify the Agreement in fulfillment of its obligations under the 1992 constitution and international laws.

5. **Recommended Option**
   It is recommended that the Government of Ghana ratifies the Agreement considering the benefits that the country has gained from the establishment of the Headquarters of FARA
in Ghana. The country has benefited from the existence of FARA as it has provided jobs for Ghanaian citizens and reinforced Ghana’s reputation and leadership in the advancement of science at the AU level.

FARA’s resort to using donor funding to pay for accommodation sends bad signals to the AU and its development partners and this could result in the Headquarters of FARA being relocated to another country.

6. **Inter-Ministerial Consultation Records**

The Ministry of Environment, Science, Technology and Innovation has engaged in consultations with the relevant stakeholders and in this regard held a stakeholder consultation workshop on 7th February 2019 with the following Institutions.

- Ministry of Foreign Affairs and Regional Integration
- Ministry of Justice and Office of the Attorney General
- Ministry of Food and Agriculture
- Ministry of Finance and Economic Planning

Dr Irene Annon-Fromppong
Director: Research and Innovation

The Research and Innovation case for Africa
Lowest agricultural productivity in the world
- less than 1/3 of average for developing world, stagnating yield growth against fast population growth
- lowest application of inputs
- limited value addition
- food imports projected to exceed 100 billion by 2025

Cereal yields t/ha

Demands on Africa's agri-food system
1. Produce significantly more food...
   - on less land,
   - with less water
   - in conditions of increasingly unpredictable climate and markets
   - with less manual labour
2. Reduce the amount of waste and losses
3. Produce more nutritious and safe food
4. Move up the value chain (processing and marketing industry grows 2X faster than production)
**FARA**

Case for shift from production to agri-food system

Underperformance of Africa's agricultural system is associated with the dominance of production. It needs to shift to an integrated agri-food system.

**FARA**

Rationale for a Pan-African agriculture Research and development organisation

- Continent is very fragmented (55 sovereign states each with its own National Research System)
- 31 countries have a population < 12m (small markets)
- Heterogeneous agro-ecologies across states

**Building blocks of FARA**

(Regional institutions function as loose consortium)
